### Qualification

Level 3 Diploma in Cyber Security Management and Operations

### Programme Duration

6 Months

### Study Method

Distance Learning

### Courses

The programme contains 6 courses which equal 60 credits.

- Threat and Risk: Expecting the Unexpected
- Network Architecture: Communications and Protocols
- Mobile Device and Data Risks
- Investigations and Incident Response
- Solutions: Future-Proofing your Business
- EU GDPR and Data Security

### Programme Overview

The programme is designed for the learners who seek a greater knowledge and understanding of the cyber security and risk management process in the digital world to develop their core capabilities and follow a career path within the cyber security sector.

Learners who complete the programme will be able to think independently for solving problems and to be familiar with the ethical issues of business practice and research.

Upon the successful completion of the programme learners are awarded a Level 3 Certificate in Cyber Security Management and Operations which is fully regulated and recognised as A Level diploma. Learners will then have the chance to continue their education or to start working in the field of Cyber Security.

- Security Consultant
- IT Security Analyst
- Ethical Hackers
- Computer Forensics
- Penetration Tester
- Security Systems Administrator
